

Application Support for Qualstar Tape Libraries

April 20, 2004

The companies listed below have performed integration testing and provide support for all the features and configurations that are incorporated in our products.

Avail Solutions, Integrity - Data protection software that bridges the gap between disk and tape technologies and dynamically chooses a backup storage device. (760-743-7200; www.availsolutions.com)

Atempo, formerly Quadratec: Time Navigator 3.6 – The award-winning software suite from the European-based leader in professional data backup, restoration and archive (www.atempo.com)

Axway: eSave—Component of Axway Open Process Storage is at the crossroads of software and hardware. It is adapted to all data formats, automating saves to different storage locations. (www.axway.com)

BakBone Software: NetVault - Backup and restore software that operates in multi-vendor networks and supports a broad range of servers, clients, database applications, and high performance storage devices - from single drives to multi-terabyte libraries (877-939-2663 or 858-450-9009; www.bakbone.com)

CommVault: Galaxy - SAN environments utilizing the most popular SAN bridges and Switches such as CrossRoads, Brocade, Vixel and Gadzooks. (www.commvault.com)

Computer Associates: BrightStor ARCserve 2000, ARCserveIT and BrightStor EB - Server-based backup and restore solutions for heterogeneous networks (800-CALL-CAI; www.cai.com)

Computer Data Strategies: Back Again/2 – The best-selling backup software package for OS/2 now supports NT (612-730-4156; www.cds-inc.com)

Connected Corporation: Connected Online Backup - COB provides the industry's first intelligent, hands-off online data protection and real-time recovery solution (508-270-0000; www.connected.com)

Cristie Data Products: PC-Bax - Fully featured, 32-bit multi-threaded backup and recovery application for Windows NT, 95/98, and OS/2. Designed for optimum performance and portability (44 0 1453847000; www.cristie.co.uk/)

Dantz Development: Retrospect - The leading backup and restore software for MAC/OS and Win 2000/NT/95/98 (800-982-9980; www.dantz.com)

everStor: Replicator, Hiarc HSM, Jb-Driver - Application specific storage solutions for Linux and Solaris (888-366-3789; www.everstor.com)

Hewlett-Packard: OmniBack II "Storage Data Protector"- Complete, reliable and highly automated backup for mission-critical data on Windows NT/2000, and Unix systems (www.openview.hp.com)

Knox Software: Arkeia - Professional network backup software for UNIX, NOVELL, NT, VMS, Linux SAPR/3, Oracle, Informix, LotusNotes (888-333-5669; 33 (0)1 48 10 89 89; www.arkeia.com)

Kayser-Threde: ProTrieve – Data management and archiving solutions that improve the handling of information – from searching to finding, from storing to retrieving. +49 (89) 72495-327; <http://www.kayser-threde.de/en/datamanagement>

Legato: NetWorker, SmartMedia and Celestra - Comprehensive backup and recovery software for UNIX and NT Now includes **SCH AlphaStor** (415-812-6000; www.legato.com)

REELbackup and REELlibrarian and REELrobot - High performance UNIX client/server backup and tape management software; now part of Legato

DiskXtender – A powerful extended file system to manage all removable media under one, homogeneous NT file system. Formerly OTG Software

Unitree Central File System: - The UniTree Central File Manager is a hierarchical storage management system allows sites to manage vast quantities of data with relatively little disk by using magnetic tape to hold least accessed files. Formerly Unitree Software

ISV Software

Application Support for Qualstar Tape Libraries

April 20, 2004

LiveVault Corp: *LiveVault* – LiveVault is the industry's first real-time backup and storage system for Windows NT servers. (508-460-6670; www.livevault.com)

NOVaSTOR: *NovaNet* – NovaNet is a distributed, enterprise backup solution for that enables all desktop and laptop users to backup and restore data immediately over the network for NT, 2000, Novell, and Linux (800-NOVaSTOR; www.novastor.com)

Q-Star Technologies: *Data Director* and *HSM* backup/retrieval and HSM software that runs on Windows and most Unix packages. www.qstar.com

Reliaty: *Quick Restore* - High performance enterprise backup and recovery software built for the real world (603-672-8600; www.reliaty.com)

Software Generation Limited: *FlashNet* - Backup, restore and archiving software for heterogeneous networks (44-1703-233322)

SQL Business Systems: *SQLStor* - Fully automated database backup solution for Microsoft SQL Server NT (800-778-7410)

Sun/LSC: *SAM-FS* - Storage and Archive Manager - File System (SAM-FS), an advanced storage management Solution for medium to high-end storage configurations (612-833-1100; www.lsci.com) (Formerly LSC)

Syncsort Incorporated: *Backup Express* - High performance backup/restore solution for UNIX, NT and NetWare supporting distributed tape libraries with centralized control from a PC-like GUI (201-930-8200 www.syncsort.com)

Tantia Technologies: *Tantia Network Storage Manager* - A fully automated enterprise backup solution with the flexibility to adapt to the needs of organizations both large and small, plus the intelligence to ensure lights-out operation, efficient use of storage media, and minimal administrator overhead. www.tantiatech.com)

Tivoli (IBM): *Tivoli Storage Manager* - Comprehensive, enterprise-wide solution integrating unattended network backup and archive with storage management and powerful disaster recovery (www.tivoli.com)

TOLIS Group: *BRU Server* – Robust support of D2T, D2D, and D2D2T strategies across client/server networks while delivering BRU's proven reliability. Including native Mac OS X (480.505.0488; www.tolisgroup.com)

UltraBac - Fastest Windows NT backup software per every independent review (425-644-6000; www.ultrabac.com)

UGS: *ES-Backup* – Client/server backup, restore and archiving software for Helios EtherShare file servers on Solaris and Linux, operated from any Macintosh in the network. (+49-511-5637697; www.ugsoft.de)

Unitrends Software: *CTAR:Net, Backup Professional* – Enterprise backup for Linux, UNIX and NT (843-626-2878; www.unitrends.com)

Veritas: *Backup Exec, and NetBackup* - Distributed systems management applications and services focused on automating the management of production systems within complex client/server environments (800-223-6736; www.veritas.com)

XenData: Archive Series--software delivers new concepts to the data storage industry. www.xendata.com

Yosemite Technologies: *Tapeware*--Yosemite Technologies is the overall storage solution from the desktop to the enterprise. www.tapeware.com

Ultera Systems: *Mirroring, Striping, and Tape RAID controllers* - High performance, high reliability and disaster recovery tape solutions (949-367-8800; www.ultera.com)
